Review date: December 2017

Heltwate School

E-Safety Policy

Definition of E-Safety:

E-safety stands for 'electronic safety'. It is not just about keeping safe on the internet but also keeping safe on all electronic devices such as mobile phones, televisions, games consoles etc.

Heltwate's approach to E-Safety:

Heltwate's approach to e-safety consists of regular reinforcement of the e-safety SMART rules during any lesson that involves the use of electronic equipment. It will be the teachers' responsibility to highlight the rules to their pupils.

Pupils will take part in stand-alone internet safety lessons/assemblies that will be differentiated by key stage.

Pupils will take part in a number of integrated (cross-curricular) e-safety lessons that will be designed and implemented by classroom teachers.

All staff, parents and carers will be made aware of the school's approach towards teaching/implementing e-safety.

All pupils, staff, parents and carers will be informed via the attached leaflet about how to be e-safe in the home and workplace.

All classes will display the Heltwate e-safety posters in their classrooms and make reference to them where appropriate.

Please see accompanying documents.

With special thanks to Kent County Council for allowing us to use their e-safety leaflet.
